Professional Summary

Results-driven Full Stack Developer with hands-on experience in building cross-platform applications using React Native (Expo), NestJS, and Next.js. Skilled in architecting scalable frontends, integrating APIs, and automating CI/CD workflows. Passionate about crafting performant, maintainable, and user-focused software solutions.

Experience

SDE-1

Salesken.ai — Bangalore, India

January 2025 – September 2025

- Developed scalable cross-platform mobile applications using **React Native (Expo)** with modular architecture and feature-based folder structure for maintainability.
- Implemented **real-time communication features** including call initiation, logging, and CDR synchronization to enhance CRM interoperability.
- Integrated secure **role-based authentication and authorization** ensuring data protection and seamless user access across Android and iOS.
- Optimized performance by modularizing core components (Dialer, Recording, QA modules) and managing global state with **Zustand**, improving app responsiveness and reducing bugs.

Projects

Automation Notifier

[GitHub Link](#)

- Designed and developed a full-stack mobile app using **React Native (Expo)** and **NestJS** to send mobile notifications via webhook integration.
- Integrated **Auth0** for secure login and Slack for real-time team notifications.
- Automated CI/CD pipelines using **Expo EAS**, ensuring smooth deployment workflows.

Weather App

[GitHub](#) — [Live Demo](#)

- Built a dynamic weather application using **React** and **OpenWeatherMap API**, providing real-time weather updates by city.
- Integrated smooth UI animations with **GSAP** and implemented theme switching using the **React Context API**.
- Designed a responsive and visually appealing interface with dark/light modes and fluid transitions.

Education

Masai School

Full Stack Web Development

June 2025 – December 2025

Acharya Polytechnic

Diploma in Automobile Engineering

June 2018 – October 2022

Technical Skills

Languages: HTML, CSS, JavaScript (ES6+), TypeScript, Java, Python

Frameworks & Libraries: React Native (Expo), Next.js, Electron.js, Tailwind CSS, NestJS

Developer Tools: Git, GitHub, VS Code, IntelliJ, vim, Postman, WSL, Expo EAS, PostgreSQL

Other Skills: Data Structures & Algorithms, Responsive Design, REST API, Linux (Arch, Debian)
